

A Pathway To Success

Leading Practices for Wholesale Distribution

With thousands of successful implementations, NetSuite has a deep understanding of wholesale distribution businesses across all sectors and the many challenges they face. As the pace of change in business accelerates—especially for those still relying on aged, on-premise ERP systems, wholesale distributors are struggling to keep up. As they strive to improve business performance and increase customer satisfaction in an increasingly competitive environment, they are struggling with:

- Metrics based on unreliable data.
- Ineffective inventory utilisation.
- Difficulty expanding into multiple channels.
- Inefficient order processes and inaccuracies.
- Order orchestration and inventory visibility issues.
- Manual processes that cannot scale.

NetSuite:

A Proven Path to Success for Wholesale Distributors

NetSuite delivers a unified and phased pathway for our customers to succeed and scale their business. Here is how it works:

- The first step is all about making sure wholesale distributors have a single view of customers, orders, items and inventory. From our experience in the sector, we know just how difficult it is to sell anything without it. Getting a wholesale distribution business on a real-time platform so all channels are operating from a unified base is the critical foundation. NetSuite has seen customers improve gross margins 1–5%.
- Once there, wholesale distributors are in a better position to add ecommerce or other omnichannel capabilities to enhance and provide a greater customer experience. This phase is critical as increasingly buyers move online, according to the latest research, 30% of buyers complete at least ½ of their purchases online.
- From there, they are freed from the constraints of their legacy systems and are ready to tackle challenges such as a lack of visibility or inefficiencies in their supply chain.
- Ultimately, the focus turns to more innovative and disruptive strategies such as pricing and margin management and business intelligence. NetSuite has seen its customers improve their actionable insights by over 56%.
